

Node-RED interface showing a flow named "Flow 1" and a function node editor.

Flow 1:

- Nodes: `mit pp` (yellow), `mit app event` (orange), `light on` (blue), `light off` (blue).
- Connections: `mit pp` connects to `mit app event`, which connects to `light on` and `light off`.

Edit function node:

Name: `mit app event`

Properties: `Setup`, `On Start`, `On Message`, `On Stop`

Code:

```
1 msg.payload={ "tem": global.get("t"), "ph": global.get("p"),
2 "conductivity": global.get("c"), "Turbidity": global.get("tu"),
3 "oxygen": global.get("o") }
4 return msg;
```

Dashboard:

Layout: `dashboard`

Site: `Site`, Theme: `Theme`
